

# EA BOOTCAMP TRAINING

## INTRODUCTION

The EA Bootcamp course is designed to provide a comprehensive introduction to individuals entering an architecture-related role and/or needing a basic understanding of enterprise architecture (EA) concepts.

## COURSE DESCRIPTION

This four-day course equips delegates with the foundational knowledge needed to participate in EA initiatives. The course also serves as a basis for future training in the field.

The EA Bootcamp is divided into three parts: Part 1 introduces and defines the concept of EA and positions it within the organisational context. It examines the problems that we are trying to solve with EA and shows how EA provides business with an enhanced return on its IT investments.

Part 2 focuses on EA methodology. It covers the official TOGAF® 9 Foundation training curriculum that includes an overview of the framework and instruction on how to apply it.

Part 3 is an opportunity for delegates to practically apply their knowledge gained during the first three days of the course. Delegates use ArchiMate®, The Open Group's modelling language for EA, to build entry-level architectures as part of a case study exercise.

## COURSE DURATION

Four days

## COURSE HANDOUTS

- Printed course manuals
- Online reference material, exercises, quizzes

## PREREQUISITES

None

## COURSE OUTLINE

- Course Introduction
- Setting the Context
- Architecture Language
- Modelling Views of the Business
- TOGAF Introduction
- Architecture Development Method
- ADM Guidelines and Techniques
- Architecture Content Framework
- Enterprise Continuum and Tools
- Reference Models
- Architecture Capability Framework
- ArchiMate

## COURSE LOGISTICS

The public course schedule is available at [www.realirm.com/training/scheduled-courses](http://www.realirm.com/training/scheduled-courses)

Private courses are available on request for groups of 5 or more delegates.
