Sparx EA Tool Training

INTRODUCTION

Sparx Enterprise Architect is a multi-user, graphical tool designed to help teams build robust and maintainable systems. With built-in requirements management capabilities, Enterprise Architect helps the user to trace high-level specifications to analyse, design, implement, test and maintain models using UML, SysML, BPMN and other open standards.

COURSE DESCRIPTION

This three-day course provides instruction on how to best use the tool as well as an introduction to the many product features and capabilities of the tool. Included in the material are the basic tools and techniques which are vital for harnessing the scalability, flexibility and power of Sparx Enterprise Architect. Once completed, the delegate will feel confident when modelling in Sparx Enterprise Architect in their daily work.

COURSE DURATION

Three days

WHO SHOULD ATTEND?

Business/System Analysts

Process Modellers/Engineers

Business Architects

Solution Architects

Enterprise Architects

Information Architects

PREREQUISITES

None

EQUIPMENT

Each delegate must bring a laptop on which Sparx Enterprise Architect is installed. Licenses must be provided. A free 30-day trial may be used.
