BPMN MODELLING ON SPARX EA

INTRODUCTION

Sparx Enterprise Architect is a multi-user, graphical tool that can be used for full life cycle modelling from high-level specifications to analysis, design, implementation, test and maintenance models. It complements UML 2.5 with BPMN support and extension elements for analysis, requirements and process management.

COURSE DESCRIPTION

This 3-day course teaches delegates how to create business process models using BPMN 2.0 in the Sparx Enterprise Architect tool. During the course, foundational process modelling concepts are explained and applied in real world examples and assignments.

Upon completion of this course, delegates will be able to create BPMN process models that capture the various scenarios of business processes in a way that can be understood by the stakeholders.

COURSE DURATION

Three days

WHO SHOULD ATTEND?

Business Analysts
System Analysts
Process Modellers
Process Engineers
Business Architects
Information Architects
Solution Architects
Enterprise Architects

EQUIPMENT

Each delegate must have a laptop on which Sparx Enterprise Architect is installed. Licenses must be provided. A free 30-day trial may be used

PREREQUISITES

Basic competence in Sparx Enterprise Architect or attendance of the Sparx EA Tool Course

COURSE CONTENT

- Introduction to BPMN

- Sparx Enterprise Architect

- Business Process Contents

- Process Scenarios

- Process Collaboration

- Intermediate Events

- Lanes

- Parallelism

- Sub-Processes

- Data, Databases and Applications

COURSE LOGISTICS

Courses are available on request for groups of 5 or more delegates.
