

TOGAF® 9 FOR GOVERNMENT

2

INTRODUCTION

TOGAF® 9 is a detailed method and set of supporting resources for developing an enterprise architecture (EA). It provides an Architecture Development Method (ADM), Content Framework and Capability Framework that can be used as the basis for creating an organisation's EA. TOGAF also provides a variety of tools, building blocks and resources that facilitate the process and enable the design and development of EA across the business, data, application and technology domains.

GWEA is the Government Wide Enterprise Architecture framework. It is derived from TOGAF and uses the TOGAF ADM for implementing EA. Its primary purpose is to prescribe a minimum standard for the development of ICT plans and blueprints for government departments and agencies.

COURSE DESCRIPTION

This course includes all the key learning points necessary to pass the TOGAF 9 certification exams, as well as content on the TOGAF methods and techniques that are adopted in the GWEA Framework. Delegates will gain an understanding of the TOGAF 9 and GWEA frameworks and how to practically apply them to support the design and implementation of an EA.

Each delegate will receive the following:

- On-line reference material and assessments
- Printed training course manuals
- A TOGAF 9 Pocket Guide
- A TOGAF® 9 Book
- A combined TOGAF® Level 1 & 2 exam voucher

DURATION

Five days

PREREQUISITES

Knowledge of enterprise business processes their supporting information systems is helpful, but not mandatory.

WHO SHOULD ATTEND?

Individuals working within and for government agencies and departments, particularly;

- Enterprise architects
- Information, technology / application architects
- System integrators
- Business analysts
- Process modellers
- Business/technical specialists developing EA

COURSE CONTENT

The course is presented using a combination of lectures and case-study discussions. The topics covered include;

- An Introduction to the GWEA Framework
- TOGAF Concepts
- GWEA Principles
- Architecture Building Blocks
- Architecture Governance
- ADM Phases and Steps
- ADM Deliverables & GWEA Architecture Views
- ADM Guidelines & Techniques
- Enterprise Continuum & Tools
- TOGAF & GWEA Reference Models
- Migration Planning Techniques
- Stakeholder Management
- The Architecture Repository
- Guidelines for Adapting the ADM
- Architecture Content Framework & GWEA Deliverable Framework
- Implementation Support Techniques

COURSE INSTRUCTOR

The course instructors are TOGAF 9 certified and have architecture and industry experience.

COURSE LOGISTICS

In-house courses are available for groups of 5 or more.
